

**D/ Packaging Line Cross Slicer Hi-cap**  
High capacity slice and packaging solution for (semi-)industrial bakeries

Brush roll for flattening the bag before closing.

After slicing of the bread, a bag blowing device automatically opens the plastic bag.

Bag closure with clip, clipband or tape.

## D/ Packaging Line Cross Slicer Hi-cap

Semi-automatic packaging line perfectly completing the fully automatic D/ Cross Slicer Hi-cap

Bread is cut with Daub's unique and proven Cross-Slice System that cuts bread under an angle with a longer stroke of the blades resulting in faster slicing (even fresh bread) and long durability of the blades.

Daub bread slicers are well-known for high productivity and accurate slicing results for all kinds of bread incl. hard crust bread, dark rye or soft fruit bread.

- Semi-automatic packaging conveyor with bag closing system in combination with a D/Cross Slicer Hi-cap
- Complete unit comprises a bread slicer, bag blower table and horizontal conveyor line with bag closing system
- Conveyor line can be placed on both right or left side of the bread slicer
- Bag closure with clip, clipband or tape
- Max. capacity of 2,400 breads per hour
- Minimum footprint of just over 4m<sup>2</sup> of complete unit incl. bread slicer
- Standard equipped with lockable swivel wheels for effortless positioning
- Brush roll for flattening the bag before closing
- Single spool for closure rolls
- Bread slicer and packaging conveyor can be operated separately
- Available in U or Z configuration
